Lock and Key

PRESIDENT'S MESSAGE

Members,

It has been an honor to serve as your President for the last two years. I congratulate the newly elected board members who will be sworn in at the seminar in June and start serving on July 1st of this year. I am excited to see all of you at the seminar in June. If you have not signed up yet, there is still time to sign up and attend. I believe that the speakers lined up for this year will be very beneficial to all those that attend. I am excited to see the addition of six vendors who will also be present to show off their products and present on their company. I am also excited about all the members who have informed us that they are willing to assist with the different committees that make up this organization. As I have talked about in the past, for this organization to get bigger and stronger, we need the membership to take an active role. I still encourage you to get involved if you have not yet as there is always more room available to improve this association. I especially hope that we can get a larger training committee put together who can make each seminar greater than the last. In conclusion, I have been honored with the support and confidence this association has given me and I look forward to what the future has in store with the new board members.

C.J. Blackwell, President

"IF YOU HAVE INTEGRITY, NOTHING ELSE MATTERS. IF YOU DON'T HAVE INTEGRITY, NOTHING ELSE MATTERS."

ALAN K. SIMPSON

WANTED

Volunteers for the Arizona Association for Property and Evidence.

The Association is in need of more volunteers from its members to help contribute and learn the rolls that make up the Association.

Training Committee Personnel– If anyone is interested in joining, they can assist at the seminar to become familiar with the duties of putting on a seminar. Ideas are needed and the more help that is provided makes for a smooth operation.

Remember that if you use a vendor see if they would like to become a corporate sponsor.

HOMEMADE PROTEIN BARS

Prep Time	Cook Time	Servings
10 minutes	25 minutes	10 bars

Ingredients

DATE VERSION:

- 2.5 cups (250 g) old-fashioned certified gluten free rolled oats
- 1 scoop (36 g) gluten free protein powder (vanilla or chocolate)
- 10 (150 g, as pitted) pitted soft Medjool dates
- ¼ cup (84 g) pure maple syrup
- 1 teaspoon pure vanilla extract
- ¼ teaspoon kosher salt
- ¼ cup (2 fluid ounces) milk (any kind) plus more as necessary
- 3 ounces unsweetened chocolate chopped and melted (optional)
- 8 ounces bittersweet chocolate chopped and melted (optional, for coating)

NUT BUTTER VERSION:

- 2.5 cups (250 g) old-fashioned rolled oats
- 1 ½ scoops (54 g) gluten free protein powder (vanilla or chocolate)
- ½ cup (40 g) unsweetened cocoa powder natural or Dutch-processed (can replace with more protein powder)
- ¾ cup (192 g) smooth natural nut butter
- ¼ cup (84 g) pure maple syrup
- ¼ teaspoon kosher salt
- ¼ cup (2 fluid ounces) milk (any kind) plus more as necessary
- 3 ounces unsweetened chocolate chopped and melted (can replace with 2 tablespoons more nut butter + 1 tablespoon pure maple syrup)
- 8 ounces bittersweet chocolate chopped and melted (optional, for coating)

Instructions

1. Line an 8-inch square baking pan or standard 9-inch x 5-inch loaf pan with unbleached parchment paper and set it aside.
2. Place the oats in a food processor fitted with the steel blade and process until ground into a flour.
   - **DATE VERSION:** Add the protein powder, dates, maple syrup, vanilla, salt, 1/4 cup milk and (optional) melted unsweetened chocolate.
   - **NUT BUTTER VERSION:** Add the protein powder, cocoa powder (or more protein powder), nut butter, maple syrup, salt, 1/4 cup milk and melted unsweetened chocolate (or more nut butter and maple syrup).
3. Process until the mixture is well-combined and is tacky (but not sticky) to the touch. Add more milk by the teaspoonful and process, only as necessary for the mixture to reach the proper consistency. ***If you opt not to use the melted unsweetened chocolate, you will have to add more milk, and the bars will not hold together as firmly when shaped.***
4. Transfer the mixture to the prepared pan and press firmly into an even layer, smoothing the top as much as possible.
5. Cover with parchment and place in the refrigerator or freezer to chill until firm (about 1 hour in the refrigerator, or 20 minutes in the freezer). Remove the bars from the pan and slice into 10 or 12 equal-sized rectangular bars.
6. Dip in the optional melted bittersweet chocolate to coat and allow to sit at room temperature until set.
7. Wrap the bars individually in waxed paper, and store in the refrigerator.

What is a Machinegun Conversion Device?

Simply put, an MCD is a device that, when integrated with a semiautomatic firearm, will convert it to fire in fully automatic capacity. MCDs are defined as machineguns under federal law, even when not integrated with a firearm. MCDs include traditional "Drop In Auto Sears" (DIASs), which are designed for use on AR-type firearms, and more
recently developed "Switches" or "Chips", which are designed for use on certain semiautomatic pistols. It is important to note that seized firearms should be thoroughly examined, as MCDs are often difficult to locate or recognize. When MCDs are seized, they should be entered into eTrace separately from the firearm with which they are found.

Examples of what to look for:

"Glock Switch" installed on a pistol slide. (This is a counterfeit "Glock" logo.) **Note:** The MCD commonly referred to, and illicitly marketed as, a "Glock switch" is illegally produced or imported by various unlicensed individuals and entities that are not affiliated with the Glock Corporation; the Glock Corporation does not manufacture, market, or sell MCDs for its firearms.

3D printed Chip. (This MCD was made using 3D printing and mimics the Original Equipment Manufacturer slide cover plate, making it difficult to identify.) **Note:** Chips can be identified by examining the underside of the slide. A leg will extend forward from the cover plate under the slide. A standard slide cover plate will not have an extruded leg present.

Image depicting a "Lightning Link," which is designed to be installed in the fire-control cavity of an AR-15 type receiver.

Images depicting 3D printed "Swift Links," which are designed to be installed in the fire-control cavity of an AR-15 type receiver.

Resources:

For Firearms Tracing assistance, contact eTrace Customer Service at eTraceAdmin@atf.gov or (304) 260-1540.

Contact your local ATF office for additional information on MCDs, as well as firearms investigative and tracing efforts at www.atf.gov/contact/local-atf-offices.

New Alert! Cybercriminal at Your Door

Ring is a popular brand of security cameras designed for home safety. Unfortunately, Ring customers were the latest victims of a phishing attack. Cybercriminals sent phishing emails spoofed as Ring to try and steal customers' sensitive information.

Cybercriminals start this attack by sending you a phishing email with an HTML file attached. The email looks like it's from Ring, and it instructs you to open the file to update your Ring membership. If you click this file, you'll be redirected to a malicious website that spoofs Ring's login page. This website prompts you to enter sensitive information, such as your credit card number and social security number. If you enter your information, you'll be redirected to Ring's legitimate website, making the email look more real.

Follow the tips below to stay safe from similar scams:

- Never click a link or download an attachment in an email that you aren't expecting.
- If you receive an email claiming that you need to make changes in your account, always log in to the organization's website directly.
- Remember that this type of attack isn't exclusive to Ring. Cybercriminals could use this technique to impersonate any type of service.

The Maricopa County Presiding IA Commissioner has made a new ruling in regard to obtaining buccal swabs. This decision vacates the previous practice of requesting a Physical Characteristics Order under A.R.S. 13-3905 to obtain buccal swabs. Effective immediately, a search warrant will be required to obtain a buccal swab order. The Maricopa County Presiding IA Commissioner clearly stated that officers/detectives can still obtain a A.R.S. 13-3905 Physical Characteristics Order for a saliva (not buccal) sample.

13-3905. Detention for obtaining evidence of identifying physical characteristics; definition

Arizona Association for Property and Evidence

Arizona Law Enforcement Accreditation Program (ALEAP)

It is the Mission of the Arizona Law Enforcement Accreditation Program to ensure compliance with established standards and a clear statement of professional objectives, which represent current and professional industry-best-practices in the safe, effective, efficient and non-discriminatory delivery of law enforcement services in the State of Arizona.

What is Accreditation?

A systematic method of conducting a detailed internal review of law enforcement agencies policies, procedures, operations and training

A voluntary program to provide public and professional recognition to those agencies who prove independent assessors that they meet or exceed the rigorous standards of the program.

Goals of Accreditation

Formalize essential managemenr procedures for greater accountability

Establish **fair and non-discriminatory** personnel practices

Improve service delivery to all Arizona communities

Build **community trust and confidence** in their police department

What are the Standards?

The 175 ALEAP Standards emphasize high-risk, high-liability areas such as:

- Role and Authority
- Use of Force
- Management, Staffing & Utilization of Personnel
- Records Management
- Information Technology
- Fiscal Management
- Recruitment and Selection of Personnel
- Performance Evaluations
- Code of Conduct
- Internal Affairs / Professional Responsibility
- Patrol Functions
- Evidence and Property Control
- Detainee Security
- OSHA Requirements
- Policing in Indian Country

Community Benefits

Increased ability for the agency to prevent and control crime by following established best-practices

Enhance community understanding of the agency and its role in the community

Increase citizen confidence and understanding of agency policies and procedures

Commits the agency to a broad range of programs that directly benefit the community

Reduced liability exposure for the agency means less tax dollars being diverted to settling vicarious liability suits.

Agency Benefits

Provides a means of independent evaluation of agency operations

Offers a mechanism for agencies to identify and correct deficiencies in agency operations

Requires agencies commit policies and procedures to writing

Minimizes agency exposure to liability, building a stronger defense against lawsuits by strict adherence to established standards

Promotes accountability among agency personnel

Increased confidence by the community in its police department
